

# Meeting Agenda – 20130405

Location: Linsen

Date: Thursday, 2013-04-05

Time: 12:00

Facilitator: Madeleine Appert

Participants: Madeleine Appert and Johan Gustafson

## Objectives

Figure out how we move on from here.

## Reports

Johan and Madeleine have decided on, and implemented a new structure.

Two new classes have been introduced to the code, Turn and TurnType.

At the moment the code is not at all running smoothly, but it's getting worse before it can get better so it still seems ok. The number of events have temporarily been increased to specify different events and facilitate over view.

## Discussion items

1. How do we move on from here?
  - It is hard to say where we are at the moment, and what remains unfinished and to which extent. We have decided on creating a list of things to check and divide them between us.
2. The list and the dividing:
  - Johan
    - Mission
    - Challenge
    - Challenge after Challenge
    - ComboBox list
  - Madeleine
    - Right Buttons in ButtonPanel
    - Right Text in TextPanel
    - Goal
    - Move Pieces
    - Clickable Tiles
    - New Game
    - Buttons in Rules Panel
3. When will we meet again and what will we have done until then?
  - Next week. As Johans schedule is unknown at the time being, we will have contact during the coming couple of days.

## Outcomes and assignments (5 min)

- We have divided the different possible problem areas among us.
