

Meeting Agenda - 20130524

Location: Linsen

Date: Friday, 2013-05-24

Time: 08:00

Facilitator: Madeleine Appert

Participants: Madeleine Appert, Isabelle Frölich and Johan Gustafson

Objectives

Discuss how to divide the remaining documentation and discuss what has been done lately.

Reports

During the last week, Bella has written the test class for the Board Class. She has also gone through parts of the code and cleaned up. Johan has also gone through the code and cleaned it up. Madeleine has written the test code for all classes in the domain packets, besides from the Board class. While doing this she has removed unnecessary code, and cleaned up. She also removed all System-out-println's.

Discussion items

1. What is left to be done?
 - The SDD and RAD need to be gone through and updated. Also all Use Case's need to be revised.
2. How shall we divide this work?
 - Seeing as Malla has already started with the RAD, he will continue with this.
 - Bella will handle the SDD and the STAN etc.
 - Johan will take care of the Use Cases and create a class diagram
3. When shall this be done?
 - A first draft should be pushed to the repository by Sunday morning at the latest so that everybody can see what state it is in and come with input.
 - Everything should be completely done by Sunday night.

Outcomes and assignments (5 min)

- We have set a final deadline for the documentation of the project.
- What is left has been gone through and the work load has been divided.
- Next meeting time and our assignments until then has not been scheduled as some members of the group are unsure regarding their schedules.
